Title: RoutineMe

Description: A social workout service where fitness geared individuals can upload, share, view, and vote on submitted workout routines. Casual users as well as certified personal trainers can create custom tailored routines with a multitude of different customizable options.

Actors:

- Viewers
- Creators
- All Users

Functionality:

- All users can create and login to their own accounts with email and password
- Viewers can swipe through submitted routines and upvote and downvote routines
- All Users can flag/favorite a routine that they have completed on their own
- Viewers can sort routines by any category they want
- Each routine has its own viewframe
- Creators can create and submit their own routines
- Creators can add multiple set/exercise types to their routine
- Creators can create a routine description

Stretch Functionality

- Trainer-specific UI
 - Certification for trainers who will be able to create workouts for clients and send to them privately
